

## PRINCE2® 2005-9 Bridging Course (London, one day)

### Benefits

- Prepare to attend the updated PRINCE2 Practitioner course
- Gain the knowledge you need to pass the *new* PRINCE2 Practitioner exam
- Update your project management understanding with the latest thinking in project management best practice

### Who Should Attend?

- People who have already attended a PRINCE2 Foundation course and wish to understand the key differences between the 2005 and 2009 versions of PRINCE2

### Objectives

- To understand the updated PRINCE2 (2009) approach to delivering projects

### Course Includes

- PRINCE2 manual (*Managing Successful Projects with PRINCE2®*)
- Lunch & refreshments
- Access to our online PRINCE2 study centre

### Own Study

- Delegates are expected to complete 2 - 4 hours of pre-course reading, via our online learning centre

### Examination

- Note: there is no examination as part of this course.

**Duration** - one day

**Cost** - £295 + vat

**In-house Courses** – Call us on 020 7148 5985 for an in-house training quotation

## PRINCE2 2005-9 Bridging Course Content

### Introduction

- The rationale behind the changes from 2005 to 2009

### Overview of the 7 PRINCE2 principles

- **Continued business justification** – make sure the project is started and continued based upon sound justifications
- **Learn from experience** – try to avoid repeating the mistakes from previous projects
- **Defined roles & responsibilities** – make sure everyone knows what is expected from them
- **Manage by stages** – break down the project into manageable stages so that progress can be reviewed and decisions taken about further investment in the project
- **Manage by exception** – delegate day to day management to the project manager, whilst high level decisions are taken by senior management
- **Focus on products** – ensure the output of the project is correctly specified and activities are focused on delivering products according to specification
- **Tailor to suit the project environment** – all projects are different, so be sensible and apply PRINCE2 to suit the particular circumstances

### Overview of the PRINCE2 processes

What is the difference between PRINCE2 (2005) processes and PRINCE2 (2009) processes?

- **Starting Up a Project** - define the project; create business case; identify customer's quality expectations
- **Initiating a Project** - identify the products that will be produced; plan the project; set up controls and files
- **Directing a Project** - authorise the project and stage plans; decide how to deal with issues
- **Controlling a Stage** - activities performed by the project manager on a day to day basis to manage a stage
- **Managing Product Delivery** - products are developed and quality is reviewed
- **Managing Stage Boundaries** - create all stage and exception plans
- **Closing a Project** - formal customer sign off; capture outstanding issues for future reference

### PRINCE2 Themes

What is the difference between PRINCE2 (2005) components and PRINCE2 (2009) themes?

- **Business Case** - develop a Business Case to drive the project decision-making
- **Organization** - establish an effective project organization structure representing the major project interests
- **Plans** - identify products to be developed from the project and the required activities and resources
- **Progress** - decision making, communication and control mechanisms that will be used during the project
- **Risk** - identify risks and put in place measures to minimise negative (or positive) consequences
- **Quality** - define and plan how quality will be managed through the project
- **Change** - capture and manage all requested changes
